

I think as long as I am paying for this service or whether they want to give it to me free, is none of NAB business. This is not against their business if they want to improve their services or continue their services. Looks like to me they want to control what I have the right to get over the air waves, that I am paying for. To me they are getting competition and they don't like competition. Throw out and do away with petition 04-160, since XM is not doing anything wrong and let the people listen to a good choice of radio of different kinds of music, news, commentaries, interviews with different kind of people, weather and traffic reports. To me this would and does help in diverting traffic to safer roads and prevents traffic tie ups in traveling across this great land of america. I listen to XM from california to texas and do not have to change stations if I don't want to. This to me makes for a safer driving condition, so defeat 04-160. Thanks. Jimmie
